

1800 WSM, 3 Diver Mixed Gas Dive Control Panel - Surface Mount

Description:

A compact IMCA DC37 compliant dive control panel. The panel allows the diving supervisor to individually control the primary and secondary air supply to each diver and to individually monitor the exact depth and dive time of each diver.

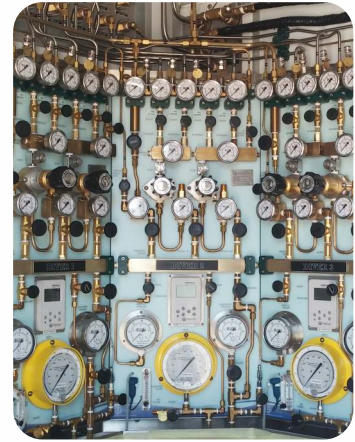

Features:

- 3 x Surface mount depth gauges, mirror band with dual scale (0 – 100 MSW and 0-330 FSW) 0.25% accurate across full scale
- 6 JIC diver's gas supply
- 4 JIC Pneumo supply
- Each diver has the following supply:
 - LP gas supply with inlet ball valve, check valve, and indicating gauge. Fittings are 6 JIC
 - 4 x separate regulated supplies
 - LP oxygen supply with block and bleed function

- Safety valves are fitted to the Pneumo gas supply for protection of the Divers Gauge.
- Gas analysis sample points are provided on each diver's manifold
- Divers breathing gauge is supplied on the diver's manifold downstream of the valve and isolated by a dedicated valve
- Three oxygen analysers are supplied
- Should one analyser fail the flexible supply pipe can be extended to reach any other analyser

Specification:

Supplied as three segments, each with the following dimensions
 Height: 1150mm
 Depth: 240mm
 Width: 470mm
 Weight: 180 kg
 Divers Supply: 6-JIC
 HP Inlets: 4 x 6-JIC 200 bar
 LP Inlet: 1 x 6-JIC 24 bar
