

### Commercial Dry Suit - Viking Haztech

**Description:**

The HAZTECH suit has been developed as a lightweight robust suit for diving in hazardous and contaminated water conditions, particularly where there may be a danger of heat exhaustion in warm water or hot climatic conditions. The HAZTECH is easily cleaned, having a smooth exterior finish. These suits are made from black woven nylon, with a red thermoplastic polyurethane (TPU) exterior with high

frequency welded seams for maximum strength and safety and heat applied internal seam tape. It also features black welded reinforcements applied to the shoulder area and elbows and embossed knee pads welded above and below the knees. The PU zipper is MED duty. Neo boots are included.

**Specifications:**

Material weight: 483 g/m<sup>2</sup>  
 Certification: EN14225-2:2005 + HZ + BIO

**Order Detail:**

### Thor Dry Suit

**Description:**

The Thor Dry Suit is built from vulcanised rubber and features vulcanised laminated polymers

carried on a multidirectional 4-way-stretch knitted polyester which provides superior strength and durability.

**Order Detail:**

Drysuit, THOR 1000G, Contaminated H2O	D-PD-316
Drysuit, THOR, 1600G, Contaminated Water Diving Suit	D-PD-317

### Commercial Hot Water Suit

**Description:**

The material is non compressible and more stable than traditional neoprene suits. The suit will not shrink when constantly dried in an industrial dryer. It features an internal rubber tube with holes that sprays hot water at the diver, Apeks On/Off valve, 6 outlets,

zipper protection and front pockets. Hot water gloves and boots are also available.

**Specification:**

Material weight: VSN 1100 g/m<sup>2</sup>  
 Max W.P.: 40 bar  
 Certification: EN14225-3:2005 (undergoing)

**Order Detail:**

Viking, Hot Water Suit, VSN Material, 2 Pockets	D-PD-318
