

Cutting & Welding Umbilicals

Description:

The Unique Maritime Group is able to supply main services umbilicals built to customer specification for divers supply, main bell, wet bell and welding and cutting end use.

Order Detail:

100m Underwater Cutting Umbilicals	D-ST-175
100m Underwater Welding Umbilicals	D-ST-176
Earth Clamp for Cutting and Welding Umbilicals	D-ST-177

Note: Underwater Cutting and Welding Umbilicals can be supplied at customer required lengths.

Miller XMT 425 Series, Welding Inverter

Features:

- Low Open Circuit Voltage
- Ultra-tough, poly carbonate-blended cover for control panel
- Line voltage compensation keeps welding output constant even if input power varies by +/-10%
- Large, dual digital meters
- Fan-on-demand cooling system operates only when needed, reducing noise, energy use and contaminants pulled through the machine
- Lift-Arc™ technology that allows TIG starting without the use of high frequency.
- Lightweight, aerospace-grade aluminium case offers

- protection with the benefit of reduced weight
- Exceptional electrical efficiency of 87.24% at 400Amps.
- Auto remote sense enables unit to automatically use remote control if connected to remote control receptacle

Specifications:

Height: 432mm
 Width: 318mm
 Depth: 610mm
 Weight: 36.3kg
 Input Power: 3 Phase, 208 - 460VAC, 50/60Hz
 Rated output: 10-38V, 5 - 425A
 Max Open Circuit Voltage:75VDC

Order Detail:

425amp Miller Welding Inverter	D-ST-181
425amp Miller Welding Inverter in handling frame	D-ST-182
